

AI Content & Automation Disclosure

Last updated: May 26, 2026

This AI Content & Automation Disclosure explains how Trafium uses artificial intelligence, automation, website generation, article generation, SEO tools, WordPress-related tools, and publishing features.

Trafium is operated by TRAFIUM LIMITED LIABILITY COMPANY, a company registered in the Republic of Armenia (“Trafium”, “TRAFIUM LLC”, “we”, “us”, or “our”).

This Disclosure forms part of our Terms of Service, Privacy Policy, Acceptable Use Policy, Payment Policy, and Refund Policy.

1. Use of Artificial Intelligence

Trafium uses artificial intelligence and automated systems to help users generate, organize, optimize, export, and publish digital content.

AI may be used for:

- website structure generation;
- landing page generation;
- article generation;
- SEO content generation;
- semantic keyword clustering;
- metadata generation;
- headings and page outlines;
- content rewriting and formatting;
- content checks;
- WordPress-ready content preparation;
- publishing workflow automation;
- other website and content automation tasks.

2. AI-Generated Output

Trafium may generate websites, articles, pages, headings, metadata, semantic keyword clusters, content briefs, SEO structures, and other digital materials based on user prompts, keywords, URLs, settings, connected integrations, and other user-provided information.

AI-generated output may be inaccurate, incomplete, outdated, duplicated, misleading, offensive, unsuitable, or similar to existing content.

Users must review, edit, approve, and verify all AI-generated output before publishing, selling, exporting, distributing, or relying on it.

3. No Professional Advice

AI-generated content provided by Trafium is not professional advice.

You must not rely on Trafium output as legal, medical, financial, investment, tax, safety, regulatory, or other expert advice.

If generated content relates to a regulated, professional, or high-risk topic, you are responsible for obtaining review by a qualified professional before publication or use.

4. No SEO Guarantees

Trafium may help generate SEO structures, semantic keyword clusters, articles, metadata, and website content.

However, Trafium does not guarantee:

- search engine rankings;
- indexing by Google or other search engines;
- organic traffic growth;
- sales, leads, revenue, or conversions;
- approval by advertising platforms;
- content uniqueness;
- compliance with every search engine guideline;
- absence of errors;
- any specific business outcome.

SEO performance depends on many external factors outside Trafium's control, including search engine algorithms, competition, domain history, backlinks, website authority, hosting quality, technical implementation, content quality, user behavior, and third-party platform policies.

5. User Responsibility

You are responsible for:

- the prompts, keywords, URLs, and instructions you provide;
- reviewing all generated content before publication;
- checking factual accuracy;
- checking legal compliance;
- checking copyright and trademark compliance;
- checking privacy compliance;
- checking whether content is suitable for your audience;
- ensuring you have rights to use any submitted or published materials;
- ensuring your use complies with applicable laws and platform rules.

Trafium does not automatically verify every factual claim, legal statement, product claim, statistic, citation, price, offer, or third-party reference generated by AI.

6. WordPress and Publishing Automation

Trafium currently supports WordPress-based website generation and may provide WordPress plugins or WordPress-related integrations.

If you connect a WordPress website, CMS, hosting account, domain, API, or publishing destination, you confirm that you own or are authorized to manage it.

If you enable publishing, autoposting, scheduled publishing, or automated content transfer, you authorize Trafium to publish, update, transfer, or process content through your connected integrations according to your settings.

You are responsible for all content published through your connected websites, CMS platforms, plugins, APIs, or accounts.

7. Autoposting Risks

Autoposting and publishing automation can create risk if used incorrectly.

Before enabling autoposting, you should ensure that:

- your website or CMS is properly configured;
- you have reviewed the content or accept responsibility for automated publishing;
- your publication settings are correct;
- your connected website is authorized;
- your content does not violate laws, rights, or platform rules;
- your use does not create spam, phishing, deceptive SEO, or other prohibited activity.

Trafium may suspend, disable, or restrict autoposting features if we detect abuse, spam, phishing, malware, copyright infringement, unauthorized access, suspicious activity, or policy violations.

8. Similarity and Originality

AI-generated content may sometimes be similar to existing content, especially when users provide common topics, generic prompts, popular keywords, or standard website structures.

Trafium does not guarantee that generated content will be fully unique, original, non-infringing, or free from similarity to third-party materials.

You are responsible for reviewing output and using plagiarism, copyright, trademark, brand, and legal checks where appropriate.

9. Human Review Recommended

Trafium is designed to assist with website and content creation, not to replace human judgment.

We recommend human review before using Trafium output for:

commercial websites;
regulated industries;
legal, medical, financial, tax, or investment topics;
product claims;
health or safety claims;
comparisons with competitors;
advertising campaigns;
public-facing business content;
high-volume publishing;
automated posting.

10. Prohibited AI Uses

You must not use Trafium AI or automation features to create, publish, or support:

spam;
phishing;
malware;
fake login pages;
impersonation;
fake reviews;
deceptive claims;
illegal goods or services;
copyright infringement;
privacy violations;
unauthorized scraping;
misleading professional advice;
mass doorway pages;
content designed primarily to manipulate search rankings;
content that violates our Acceptable Use Policy.

11. Third-Party AI and API Providers

Trafium may use third-party AI models, APIs, infrastructure, and service providers to generate, process, analyze, or improve content.

Your prompts, keywords, URLs, content, and other information may be processed by such providers as needed to provide the Service.

Third-party providers may have their own terms, policies, limitations, and technical constraints.

Trafium is not responsible for third-party AI model outages, API errors, model behavior, policy changes, output limitations, or service interruptions outside Trafium's control.

12. Changes to AI Features

Trafium may change, add, remove, replace, or update AI models, prompts, orchestration logic, generation workflows, content checks, SEO tools, publishing tools, export formats, and automation features at any time.

We do not guarantee that the same prompt, keyword, topic, or configuration will always produce the same result.
